BEFORE YOU START

What you need to know

The first 5 activities are for parents only and end with a conversation with your partner. The other 5 are games for the whole family.

All the activities and games ask you to reflect on your own point of view.

- Print and cut out the materials: cards, diary pages, sheets and board.
- Print the parents' diary pages twice, so that each parent has their own.
- Print the portrait sheet for Game 3 once for each family member.
- The stickers for Game 3 and Game 5 are not included in the printable materials: you can draw instead, or use stickers you've bought.
- Some games will ask you to print pictures, so keep a printer close at hand.
- In some activities you will use a Generative Artificial Intelligence. During the study we used Copilot, but any similar tool will do.

PART 1 · ACTIVITIES FOR PARENTS

Activity 1 · Gender moments 5
Activity 2 · The thermometer. 6
Activity 3 · Hunting stereotypes 8
Activity 4 · Mind the prompt! 10
Activity 5 · In their shoes 12

PART 2 · FAMILY GAMES

Activity 6· Who's most likely to...?. 15
Activity 7· The inquiry 16
Activity 8· The mirror 17
Activity 9· AI made who?. 19
Activity 10· Family portrait. 20

STEP 4

Step 4 Have your family portrait generated and print it

It's the Generative Artificial Intelligence's turn. Remember to use exactly the prompt you wrote.

Choose the portrait that represents you best, print it and stick it on the canvas.

STEP 5

Reflect together on the family portrait

How did you show the adjectives you chose in your family self-portrait? Did you add any extra elements? What were the AI's images like? Did they have all the adjectives you chose? Did they have extra elements or things that didn't fit?

Would you change anything in the AI's results? Are there similarities between your family self-portrait and the portrait made by the AI? Which of the two do you prefer? Do you think the AI's one is good enough?

Last game done!

How did the family portraits go?

Thank you for taking part in these games! I hope they were fun and that you learned something new.

ACTIVITY 10

Family portrait

WHO TAKES PART: the whole family together

MATERIALS

1 canvas

2 diary pages

STEP 1

Complete the family identikit together

First, complete the family identikit together by choosing the season, the colour and the habitat that best represent your family. You can use stickers, draw or write.

Remember: it should be something you recognise yourselves in as a family.

When you're done, explain each choice with one adjective.

STEP 2

Write the final prompt

Copy the adjectives: the season's adjective is adjective 1, the colour's is adjective 2 and the habitat's is adjective 3.

STEP 3

Create your family self-portrait

Your turn: draw your family self-portrait together, following the request, that is, the prompt.

ACTIVITY 1

Gender moments

WHO TAKES PART: parents only

MATERIALS

12 cards

2 diary pages

STEP 1

Choose a card

Read the cards and choose one that helps you reflect on something that happened to you.

This activity will prepare you for the second family game, where your children will ask you questions about something that happened to you. Choose something you would feel comfortable talking about with your family.

STEP 2

Reflect on the event

What happened? How did it make you feel? What did you learn?

You've finished day one

All that's left is to talk it over with your partner (:

ACTIVITY 2

The thermometer

WHO TAKES PART: parents only

MATERIALS

2 diary pages

STEP 1

Complete the self-assessment

How feminine do you feel? … And masculine? … And neutral?

Keep in mind that the three don't have to add up to 100%. How moody do you feel you are?

Put an X on the matching dot (from 1 to 5).

Done? Carry on with the other adjectives; for now you can ignore the letters on the side ;)

STEP 2

Work out your score

Time for a little maths, but don't worry, I'll guide you!

Look at the letters A, B and C next to the adjectives and add up the scores for each letter: the points for all the As, all the Bs and all the Cs. Now multiply each letter's total by 2 and colour in the three bars accordingly.

For example, if your A total is 30, 30 × 2 = 60: colour the Neutral bar up to just above the 50 line.

ACTIVITY 9

AI made who?

WHO TAKES PART: the whole family together

MATERIALS

15 cards

20 tiles

1 board

1 diary page

STEP 1

Get ready to play

Spread the tile cards over the board: each tile goes on top of the matching image on the board, with the image facing up.

Shuffle the identikit cards and place them next to the board, image side down.

STEP 2

Let's play!

Take turns drawing an identikit card without showing it to the others. Read aloud only "This is a person who is…" and the 3 adjectives. The others choose which image on the board matches the description on the identikit card. To mark the images you've ruled out, just flip the tile over. Whoever has the identikit can give up to 2 hints, written on the card, if they see the others are stuck.

The game continues with a new identikit card.

Fourth game done!

Was it hard to match the images with the adjectives?

STEP 3

Create your self-portrait

Your turn: draw your self-portrait following the request, that is, the prompt.

STEP 4

Have your portrait generated and print it

It's the Generative Artificial Intelligence's turn.

Remember to use exactly the prompts you wrote, one prompt at a time.

Choose the portrait that represents you best, print it and stick it on the canvas.

STEP 5

Reflect on the portraits individually

How did you show the adjectives you chose in your self-portrait? Did you add any extra elements? What were the AI's images like? Did they have all the adjectives you chose? Did they have extra elements or things that didn't fit?

Would you change anything in the AI's results? Are there similarities between your self-portrait and the portrait made by the AI? Which of the two do you prefer? Do you think the AI's one is good enough?

Third game done!

Did you enjoy the individual portraits? How did it go with the AI?

STEP 3

Reflect on the result

Now it's time to take a moment to reflect on your result. Look back at the adjectives: in a study from the 1970s, the researcher Sandra Bem classified these adjectives into three categories, "feminine" (C), "masculine" (B) and "neutral" (A).

Quite a few years have passed, but this division is still often visible in the expectations some people have of themselves and others, in other words, in gender stereotypes. For some adjectives, though, these expectations have faded or are fading: some stereotypes are slowly losing strength, or time has made certain associations fall out of use (for example, ambitious person – masculine).

What do you think of the result? Do you agree? Does it not add up? Do you have doubts about it? How does it make you feel? Does it bring up any insecurities?

You've finished day two!

All that's left is to talk it over with your partner (:

ACTIVITY 3

Hunting stereotypes

WHO TAKES PART: parents only

MATERIALS

4 cards

2 stories

2 diary pages

STEP 1

Read the two stories and reflect

Start by reading the cards with the two stories.

Did you notice any stereotypes? Where? How do they show up?

Putting yourself in the teacher's shoes, would you act the same way? What would you do differently? Why?

STEP 2

Read the prompt and look at the 4 images

The prompt, that is, the request, was to generate:

PROMPT

"A primary school child who is defensive, strong and focused"

The two important elements are that the person requested is from primary school and that they represent the 3 adjectives. Copilot gave 4 images.

ACTIVITY 8

The mirror

WHO TAKES PART: the whole family, each on their own

MATERIALS

1 canvas per person

2 diary pages

STEP 1

Complete your personal identikit

Today everyone will create their own portrait individually.

First, complete your identikit by choosing the plant, the animal and the job that best represent you. You can use stickers, draw or write.

Remember: it doesn't have to be your favourite thing, but something you recognise yourself in.

When you're done, explain each choice with one adjective… I know, sometimes it's hard to pick just one!

STEP 2

Write your prompt individually

You now have everything you need to write your prompt, that is, your request for the portrait.

Copy the adjectives: the plant's adjective is adjective 1, the animal's is adjective 2 and the job's is adjective 3.

ACTIVITY 7

The inquiry

WHO TAKES PART: the whole family together

MATERIALS

8 cards

1 diary page

STEP 1

Be the investigators

The parents are already ready with their story (the one chosen in the first activity): all you have to do is pick up your magnifying glass and find out more.

Taking turns, start with the “Investigator” cards and then let your curiosity guide you: ask questions to find out more about your parents’ stories.

What happened? How did they feel? What did they learn?

Second game done!

How was it? Did you discover anything new about your parents?

STEP 3

Reflect on the stereotypes

Do you notice any stereotypes? How do they show up? Why do you think they are stereotypes? Circle them on the diary page.

You’ve finished day three!

All that’s left is to talk it over with your partner (:

ACTIVITY 4

Mind the prompt!

WHO TAKES PART: parents only

MATERIALS

4 cards

2 diary pages

STEP 1

Read the prompt and look at the 4 images

Today's focus is the link between the prompt and the generated images.

The first thing to notice is that, although the request is structured like yesterday's, the adjectives are different. The prompt was to generate:

PROMPT

"A primary school child who is elegant, clever and joyful"

Copilot generated 4 images.

STEP 2

Reflect on the connections

Which elements of the prompt are present in the images? Did the images capture the meaning of the adjectives? Is any adjective missing? Are you unsure about any of them?

Are there other elements that indirectly refer to the request? Which ones? In what way?

ACTIVITY 6

Who's most likely to...?

WHO TAKES PART: the whole family together

MATERIALS

15 cards

1 diary page

STEP 1

Shuffle the cards

Here we are at the first family game! To start, gather everyone close together, around a table or on the sofa.

Ready? Start by shuffling the cards.

STEP 2

Let's play!

Take turns drawing a card and reading it aloud. Everyone points to the person present who, in their opinion, is most likely to do that thing.

The game goes on until you run out of cards.

During the game you can explain your choices and share your opinions. Why do you agree? Why do you disagree?

First game done!

How was it? Did you learn anything new? Do you know each other well?

You've finished day four!

All that's left is to talk it over with your partner (:

ACTIVITY 5

In their shoes

WHO TAKES PART: parents only

MATERIALS

4 cards

1 identikit

2 diary pages

STEP 1

Read the identikit and look at the 4 images

You have the identikit of the girl who wanted Copilot to make her portrait, and the 4 images it generated.

STEP 2

Reflect on the girl's emotions

Putting yourself in the girl's shoes, would you feel represented by the generated images? Would you be satisfied with them? What feelings would you have? Name 3.

STEP 3

Reflect as a parent

Imagine this girl were your 10-year-old daughter. As a parent, do you find the results satisfying? Do you think they could help her reflect on her own identity? Do you think they could help her better understand the limits of Generative Artificial Intelligence?

You've finished day five!

Remember to look back at your diary notes from day one: in the second family game, your children will ask you questions about a personal experience of yours.

Other than that, as usual, all that's left is to talk it over with your partner (:
